

For those of you involved in government contracting, I want to introduce an organization that I am part of.

The Federal Circle (<http://www.TheFederalCircle.com>) - is Washington, DC based and provides funding support and strategic advisory services to middle-market companies working in the federal contracting space. It is run by Dr. Earl R. Smith II (a long-time member of *it4dc*). The Federal Circle works primarily with middle-market and larger government contractors. It partners with teams and existing companies. They arrange funding for acquisition and/or expansion. TFC helps its partners to up their game and win big in the Federal space. Their core team and network of advisers have a deep understanding of the government contracting space. Together they represent a rich resource for companies trying to generate traction in these very competitive markets. TFC is interested in connecting with proven entrepreneurs and companies seeking to expand their federal business base. They manage a Linked In Group - The Federal Circle (<http://www.linkedin.com/groups?mostPopular=&gid=3169063>)

Membership is open but will soon be by invitation only - so join up now if you are interested.

Please Contact Dr. Smith at DrSmith@Dr-Smith.com to find out more about The Federal Circle.

Thanks

Dip Chandra
